

On June 13, 2008 we had the most horrific experience one can have. We had someone walk through our front door, rob our company and worse, shoot and kill two people. At first we locked our doors and just shut ourselves off to the world. As a business owner, I knew this could not be the future and immediately had to resolve this situation in a way to keep our employees and guests safe. I chose CPSL because of their trustworthy reputation to help us out. They were there to consult so that I could make the decision that best fit our needs. After the choices were made, CPSL's staff was very professional and discreet in installing a system that meets our demands.

As an business owner and a family man, safety of my family, home, business, employees and guests comes first. CPSL gives me the security I need.

A handwritten signature in blue ink that reads "John A. King, II". The signature is fluid and cursive, with a large initial "J" and "K".

John A. King, II
